About us

We love to be called “filter artisans” because we follow our products one by one from design to production. Passion and ethics for what we do offer our customer a complete service. Internal production allows us to create filters for every kind of application.

All of our filters are designed and manufactured in accordance with all international standards.

A Filtration Story

GV Filtri Industriali design and produce industrial filters from over 30 years.

Six are the main areas in which we operate: Oil & Gas, Chemical and Petrochemical, Water Treatment, Power Generation, Food and Pharmaceutical, Industrial.

Our ability is to follow customer's orders throughout all its iter from design to installation.

This means rapidity, precision and excellent value for money. Our organization, in addition to the continuous training, which we consider something essential, has enabled us to reach a high level know-how in our job, enabling us to offer always accurate and targeted solutions.

GV Filtri Industriali as well as offering its customers a complete range of filtration systems and products provides multidisciplinary technical consulting.

Our Company along the last years.

1981

ORIGINS

Mr Guido Vicentini produce OEM filter elements for big Italian distributors.

2000

NEW PRODUCT

GV Filtri is still focused on small carpentry and OEM filter elements, located in Cambiano (TO).

2008

LAUNCH

Mr. Marco Vicentini (son of Guido) is new General Manager of GV Filtri and his brother, Mauro Vicentini, is the Production Manager and shareholder of the company

2009

EXPOSE

Most of GV Filtri products are sell with our own logo on national and international markets. First exhibition at Achema

2010

ENGINEERING

Flavio, our Technical manager with a great know how and experience in filtration field enters in GV Filtri team, now we can design and produce complete filtering systems as well.

2012

NEW HQ

Our continue grow up on Italian and abroad markets motivate us to move in a bigger headquarter located in Baldissero Torinese (TO) and to do investments on communication such as new website and advertisings. Moving our company on international vision has introduced in our team Federica our export manager who can speak 3 foreign languages and know international rules.

2013

INVESTMENTS

After our strong marketing activities and market analysis we have decided to invest on new machineries & equipment moreover in new members of our team from technical to production department. GV Filtri gets ISO 9001 certification

CE 0948

2014

NOW

We are focused on design and manufacture of pressure vessel; therefore, we get PED module H certification. Our winning marketing strategy has become reality with huge demands (and POs) not only for complete filter systems, but also for a lot of disposables and replacement for customised filter elements. The growing demand of our customer for some experts closer to them who can solve their filtration problem bring us Angelo and other Italian agents to satisfy customer needs.

GVFILTRI

A FILTRATION STORY

2017

REBRANDING

Our need to share with all stakeholders all the values which are the beating heart of GV Filtri has been achieved by the new company rebranding, website and advertising.

Moreover we have taken part to different Italian events and fairs to be more recognisable locally (e.g. A&T fair in Turin, sponsorship and active participation of various category events such as CNA and Unione Industriale and sponsorship of local football team)

2018

R&D - EXPORT

Our territory is part of us, therefore we have decided to invest on research with the Politecnico of Turin developing a new antibacterial filter coated by sputtering. We believe in industry 4.0, therefore we have developed new smarter control panels for standard and self-cleaning filters based on a cloud. Achema fair was successfully again, we have got a lot of contact let's see what the future holds...

2016

MILAN BRANCH

We open a new commercial branch in Milano (Copernico). One of our new colleagues is Sergio, an expert of oil and gas filtration, who has grown a big background in this field working for Envirogen Italia

2015

Fair & Marketing

GV Filtri Takes part at 2 international Exhibitions: Achema & Hannover Messe

About our Top Technology

Research and development of new products and technologies let us to satisfy all special applications needs.

We constantly invest in training and our qualified staff can find the best solutions for both filter materials and applied technology.

Each of our products is customizable and is designed to meet filtration needs of every customer.

We love to be called "filter artisans" because we follow our products one by one from design to production. Passion and ethics for what we do offer our customer a complete service.

Internal production allows us to create filters for every kind of application.

All of our filters are designed and manufactured in accordance with all international standards.

"Success seems to be connected with action. Successful people keep moving. They make mistakes, but they don't quit."

—Conrad Hilton

People behind our story

THE HEART OF OUR COMPANY

Sales team

We have an "informal" business concept in which every collaborator, partner or employee has his own autonomy, even though he is part of a more complex structure.

R&D

GV Filtri looks carefully at technologies, to solve any need related to filtration.

We always look for innovative solutions with high performance to solve pressure drop problems.

This is why we endorse important partnership, in order to guarantee an innovative production ready to meet the needs of our customers.

In addition to providing costumers with a complete range of filtration systems and products, GV Filtri offers multidisciplinary technical advice.

IoT

Remote tracking of filter performance. Muraqaba GV assistance was developed to offer a monitoring service and to **predict when to carry out maintenance.**

Welding Technology

Thanks to our multiple certifications on welds, we are able to create **autenitic stainless steel** filter elements for the most critical filtration applications.

Available Materials

Monel 400

Inconel 625

Hastelloy C276

Hastelloy C22

Legia 254 – F44

High Performance Filter Media

We are able to offer a wide range of filter media suitable for solving the most difficult process problems. We offer bespoke **solutions even for the most critical applications.**

MANUNET CALL 2018

**CO – SPUTTERING DEPOSITION
OF SILVER NANOCCLUSERS/SILICA
COMPOSITE COATING**

**COMPLETE SARS-COV-2
TITRE REDUCTION TO
ZERO**

Project Name	Overall score
BIO-KILLER	85
SEI	81
AFCONTRAST	75
MOTORAMIC	68
RAMBOat	65
POLYWORK	65
IJOINING	63
SANDWASTE	62
MONICHEA	61
eBoost	60
3DAMFIRE	45
C2MAP	44

HIGHLIGHTS

- SPUTTERED ANTIMICROBIAL/VIRUCIDAL SILVER NANOCCLUSERS/SILICA COMPOSITE COATING.
- SARS-COV-2 TITRE REDUCTION TILL ZERO ON COATED FACE MASK
- SUITABLE FOR COATING SEVERAL AIR FILTERS AND OTHER SURFACES

BIOKILLER

BIO-KILLER will develop innovative anti-biopollutant reusable filters, able to combine anti-pathogen functionalities with re-use after thermal treatment.

BIO-KILLER coatings are based on nanoparticles embedded in a glass or ceramic matrix, effective in preventing bacteria, fungi, mould and virus proliferation, already proven to be efficient even after heating up to 450 °C in air.

The filters will work for several industrial applications to remove bacteria and viruses not only from air, but also from lubricant fluids deriving from the cutting process of metals. The advantage of anti-biopollutant filtration is two-fold: first the positive societal impact, on health, safety and wellbeing of the entire population, especially in consideration of the relation between the antibiotic resistant superbugs and new airborne diseases.

Second, the positive economic impact for the metal cutting industry: our BIO-KILLER filters will increase the lifetime of cutting fluids and equipment, reducing costs and increasing efficiency. The BIO-KILLER coating will be used to obtain thermal re-generation of filters, a first-of-a-kind solution for both the air treatment and the metal cutting industry.

LONG TERM PARTNERSHIP 27

Politecnico
di Torino

J-TECH
@PoliTO

We are really proud to be able to cooperate with J-Tech Lab, the advantages to have the opportunity to deal directly with top researcher of Italy is not only a money value but a look for a future.

We suggest to any Piedmont and Italian company to try and deal with them according to your capability and possibility without fear, the juice is worth the squeeze.,
